Minimized downtime	Better IT security	Complete management and support
<p>Downtime caused by a single ransomware infection costs small businesses an average of \$64,645. Coveware Q1 2019 Global Ransomware Marketplace Report</p> <p>The cost of downtime can be devastating. Our proactive maintenance and 24/7 monitoring keeps you up and running.</p>	<p>Two-thirds of small and medium-sized businesses suffered a cyber attack in 2019. Ponemon 2019 State of Cybersecurity in SMBs Report</p> <p>Sleep easier knowing your data and IT assets are protected with fully managed antivirus, firewall, and backup.</p>	<p>1 in 3 office workers spends at least 8 hours a month on IT work outside their responsibilities. NinjaRMM Involuntary IT in 2018 Report</p> <p>No more disruptions or distractions. We cover all aspects of your network so you don't have to — from software and hardware to user support.</p>

All for a fixed monthly price

Simple, predictable, and at a fraction of the cost of in-house IT.

"When my computer started crashing, Paul was very patient and responsive when I reached out to him. He took the time to walk me through all the steps to diagnose my computer remotely without needing to go anywhere. He would also very promptly follow up with me after each session."

Gerardo Lona, Owner, Breakthrough Advancement LLC

Features

24x7 Advanced Network Monitoring

By proactively analyzing network activity we're alerted to potential issues and can immediately address them before they become costly problems.

Proactive Maintenance

Our team provides preventative maintenance for devices ranging from desktops and laptops to networking hardware. Our software agents allow us to do it all silently in the background without disrupting your employees.

Patch Management

Our state-of-the-art patching engine allows us to silently update operating systems and third-party software, so you can rest easy knowing your systems are secure and always up-to-date.

Layered Security & Backup

Protecting your company from today's evolving threats requires defense in depth. In addition to deploying and managing antivirus software, we manage & track backup jobs and we analyze traffic flow to prevent, detect, and react to potential attacks.

Remote Help Desk & Onsite Support

Our best-in-class remote access provides quick and reliable support to address day-to-day IT-related issues and interruptions.

Strategic IT Consulting

We'll work closely with you to evaluate the health of your network and deliver a robust IT and security plan that will scale as your business grows.

Love IT Services is the proactive partner you can count on. Contact us for a consultation today.
